Swimify Livetiming App Update - v3.3

2026-11-20 - Josefin Ström - Releases

A new version of Swimify Livetiming App has been released. Available on Google Play and Apple App Store.

A faster, smoother Swimify, with a new Info tab and club favourites

This update makes the app faster and more stable, and gives you more to explore around each competition.

Faster, smoother, more reliable

Live results scroll more smoothly, the app uses less battery during long sessions, and we've fixed a number of crashes. If you tap a notification for a different meet, it now opens that meet directly.

Better favourites

- Your favourite swimmers are now highlighted correctly everywhere, even when two swimmers share a name.
- Subscribers can now favourite whole clubs, which highlights all of that club's swimmers.
- If a favourite can't be saved, the app now tells you.

A new Info tab

Each competition's Info tab now shows the organiser's pages, competition statistics, sponsors and a venue map. Tap the map to get directions.

Never miss an announcement

When an organiser posts an important announcement, it now appears as a banner at the top of every screen in the competition.

Small touches

Pull to refresh always loads the latest information.

Thanks for following the action with Swimify!
