

AQUA points base times updated for 25m competitions

2024-09-23 - Erik Fornander - Releases

The base times for 1000 AQUA points in 25m pool has been updated now. So you must make sure that you update the AQUA base times in Swimify Meet Manager for any competition in a 25m pool that you organize.

You do this easiest by going into the Points tab (1), click on the button "Edit AQUA 1000 times" (2), click "Import base times" (3) in the new window and finally click on "Download and import current base times from internet" (4).

Important: You must also make sure to delete any old base times that may exist previously!

The screenshot shows the 'Points' tab in the Swimify Meet Manager software. The interface includes a menu bar at the top with options like Menu, Competition, Records, Events, Teams/Clubs, Competitors, Swimify LiveTiming, Withdrawal, Time schedule, Seeding, Results, and Points. The 'Points' tab is selected, and the 'Edit AQUA 1000 times...' button is highlighted with a red box and a red circle labeled '2'. Below this, the 'AQUA 1000 Base times' window is open, showing a list of base times. The 'Import base times' button is highlighted with a red box and a red circle labeled '3'. The 'Download and import current base times from internet' button is highlighted with a red box and a red circle labeled '4'. The 'Imported times 1' table is visible, showing base times for various events.
