## Miscellaneous

Josefin Ström - 2026-05-30 - [FAQ - Frequently Asked Questions - Swimify Admin](#)

### **Why does my image have black edges / sides?**

- If your image is a JPG file (ends with jpg/jpeg) and does not have the correct measures specified on the Swimify Admin page, it will get black edges / sides. This is a jpg technical issue. To fix this problem you can upload a png image (ends with .png), or you can make sure that your image adheres to the specified dimensions on the Swimify Admin page.
