AQUA points base times updated for 25m competitions

2024-09-23 - Erik Fornander - Releases

The base times for 1000 AQUA points in 25m pool has been updated now. So you must make sure that you update the AQUA base times in Swimify Meet Manager for any competition in a 25m pool that you organize.

You do this easiest by going into the Points tab (1), click on the button “Edit AQUA 1000 times“ (2), click “Import base times“ (3) in the new window and finally click on “Download and import current base times from internet“ (4).

Important: You must also make sure to delete any old base times that may exist previously!
